

ARCHAEOLOGY, ASSOCIATE IN ARTS

This specialized program in Archaeology is not intended to be used as a license for independent unsupervised archaeological research. Rather it is designed to introduce students to archaeological research, and provide opportunities to actively participate in supervised archaeological survey, excavation, and artifact analysis.

To earn an Associate in Arts Degree with a major in Archaeology, students complete 24 specified units, plus General Education Degree Requirements for a minimum total of 60 units. These major requirements optimize preparation for upper-division coursework for advanced degrees in Archaeology offered by four-year institutions. In addition, earning this degree suggests an achievement of technical skills that may be helpful in seeking immediate employment with a local archaeological firm, or obtaining a position on an archaeological project either within or outside the United States.

In addition to General Education degree requirements, complete the following:

The plan of study is for the student to complete all classes within two years. Ideally, they would begin by taking core classes such as ANTH M01, M02, M03 and then continue with the "Saturday field classes," specifically ANTH M05, M10, M12, and M19. There is no particular order which these classes need to be taken, with the exception of ANTH M03, which is strongly recommended to be taken in the first semester (or as soon as possible).

Upon successful completion of this program, students will be able to:

- demonstrate an understanding of the perspectives, theories, methods, and core concepts of archaeology as a social science and scientific discipline.
- demonstrate a skill set in archaeological field methods including mapping, excavating, and laboratory analysis that will enable them to be an active member of future archaeological research projects.
