

# COMPUTER PROGRAMMING, CERTIFICATE OF ACHIEVEMENT

A computer programmer is a professional who is skilled in writing small, medium to large-scale computer applications. This requires the knowledge and practice of a variety of areas in Computer Science. This certificate focuses on learning and using advanced programming techniques like C++, Java, and Python to build a variety of software applications. In addition, it covers core computer science concepts such as Computer Architecture, Computer Organization, Data Structure, and Database Theory.

A computer programmer is a professional who is skilled in writing small, medium to large-scale computer applications. This requires the knowledge and practice of a variety of areas in Computer Science. This certificate focuses on learning and using advanced programming techniques like C++, Java, and Python to build a variety of software applications. In addition, it covers core computer science concepts such as Computer Architecture, Computer Organization, Data Structure, and Database Theory.

To earn a Certificate of Achievement in Computer Programming, students must complete the following courses.

Course ID	Title	Units/ Hours
Required Core: Complete the following		
CS M10A or CS M125	Programming Concepts and Methodology I	4
CS M10DB	Database Management Systems and Applications	3
CS M10J	Introduction to Computer Programming Using Java	4
CS M10P	Introduction to Computer Programming using Python Language	4
CS M135	Programming Concepts and Methodology II	3
CS M145	Computer Architecture and Organization	3
<b>Year 1</b>		
<b>Fall Semester</b>		<b>Units/Hours</b>
CS M10A or CS M125	or Programming Concepts and Methodology I	4
CS M10DB	Database Management Systems and Applications	3
		<b>Units/Hours</b>
		<b>7</b>
<b>Spring Semester</b>		
CS M10J	Introduction to Computer Programming Using Java	4
		<b>Units/Hours</b>
		<b>4</b>
<b>Year 2</b>		
<b>Fall Semester</b>		<b>Units/Hours</b>
CS M10P	Introduction to Computer Programming using Python Language	4
CS M135	Programming Concepts and Methodology II	3
		<b>Units/Hours</b>
		<b>7</b>

Spring Semester		
CS M145	Computer Architecture and Organization	3
<b>Units/Hours</b>		<b>3</b>
<b>Total Units/Hours</b>		<b>21</b>

Upon successful completion of this program, students will be able to:

- design, code, test, and debug computer programs.
- understand and use application software, and the entire components of the system unit.
