

EDUCATION

Program Purpose: The Elementary Teacher Education program is designed for students who aspire to become elementary or special education teachers, and offers a breadth of study across disciplines. Elementary Teacher Education incorporates subject matter that prepares students to teach elementary education level subjects including science, mathematics, literature, history, geography and the arts. Elementary Teacher Education coursework will also introduce theories of education and child development, as well as provide an early field experience. Students who complete these interdisciplinary courses will be able to:

1. *demonstrate college-level skills in written English, oral communications, math, and critical thinking;*
2. *demonstrate a basic grasp of the disciplines most commonly taught in elementary schools in California, including physical science, biology, art, literature in a cultural or geographic context, world geography, United States history, and United States government;*
3. *demonstrate a basic grasp of child growth and development.*

Career Information

Due to the varying certification requirements in the education field, students are advised to consult with a Child Development/Education faculty member prior to finalizing their Student Education Plans.

For additional coursework to prepare for careers with elementary-aged children, particularly in transitional kindergarten through second grade, please see courses in the Child Development section of this catalog.
